**65+**

Countries with CQG customers

# TURNKEY SOLUTIONS

Overnight delivery. Five or 500 traders - we'll have you up and running in under twenty-four hours.

## CQG's Hosted Networks

Our experience guarantees world-class performance, speed, and reliability:

- CQG-operated market data networks and exchange gateways reduce your overhead.
- Ease of implementation and dedicated CQG support increase your operational efficiency.
- Hosted Exchange Gateways give your customers ultra-low-latency direct market access.
- CQG's risk engine gives you maximum control over customer accounts. The margining system monitors incoming orders and evaluates worst-case scenarios in real time.
- CQG's ticker plant and server farms deliver market data to your customers anywhere in the world.

## Customer-Driven Solutions

Customers with unique requirements can look to CQG for custom solutions:

- Proprietary data streams and news feeds can be distributed through the CQG network to designated staff and customers.
- Customers can route orders directly to the Hosted Exchange Gateways from their applications via a standard FIX 4.2 API.
- CQG's hosted gateways' proximity to the exchanges provides ultra-low-latency order routing.
- CQG's Customer Account Service Tool (CAST) gives you administrative access to set up and configure customer accounts.

# RISK & ACCOUNT MANAGEMENT SOLUTIONS

Confidently manage risk, accounts, and orders.

## Comprehensive Risk and Account Management

### CQG's Industry-Leading Proprietary Margining System

CQG's risk management module enables FCMs to perform pre-trade and post-trade risk evaluation using a wide variety of parameters. Margin analysis is performed on a real-time basis, so incoming orders can be monitored for account risk. Account types supported include single, give-up, omnibus, commercial, and group accounts with shared purchasing power. CQG's Customer Account Service Tool (CAST) is an easy-to-use application for brokers and support personnel to manage accounts and orders. CQG provides in-depth CAST training to our partners.

# PRODUCTS & FEATURES

## Products

### CQG Integrated Client

CQG Integrated Client provides access to global market data and includes innovative trading interfaces for electronic trading and order management. CQG Integrated Client offers industry-leading charting and analytics, quote displays, and exclusive tools designed for electronically traded markets.

### CQG QTrader

CQG QTrader offers powerful trading tools and technical analysis features to trade and monitor the markets. It combines advanced analytics, limited to one chart, and multiple trade execution interfaces in one comprehensive solution for professional traders and brokers alike.

### CQG Desktop

CQG Desktop is an HTML5-based platform that delivers global market data, order management, electronic trading, and analytics. The flexible technology allows integration with third-party sources for news, commentary, and more. CQG Desktop is the next generation of CQG products.

### CQG Mobile

CQG for iOS and CQG for Android give you on-the-go access to quotes, analytics, and trading. CQG is always with you and easier to use than ever. CQG Mobile is integrated with all CQG platforms for full account access on-the-go.

### CQG Spreader

CQG Spreader provides sophisticated order management and ultra-low-latency trade execution. CQG Spreader allows you to easily create and manage multi-legged, intramarket, intermarket, and cross-exchange spreads and to effectively manage incomplete orders.

### CQG FX

CQG FX provides charting, analytics, and order execution tools tailored for the professional foreign exchange trader. Broad market coverage includes spot metals and all major and minor FX pairs.

### CQG and Excel

CQG provides the ability to bring real-time market, study, and orders and positions data into Microsoft Excel®. You can create trading strategies, build custom models, and execute directly in Excel.

### CQG APIs

The CQG APIs offer solutions for customers needing the most reliable data, powerful analytics, and ultra-low-latency trading. The CQG APIs allow you to seamlessly export market data, analytics, and order routing to external applications.

### Historical Data

CQG Data Factory provides the industry's cleanest market data over the Internet. Access decades of historical data, including intraday data starting from 1987.

## Product Features

### CQG Hosted Solution

CQG operates state-of-the-art market data and trading infrastructures for our customers, so they can focus on their businesses. Our hosted servers deliver high-quality market data to thousands of customers around the world. CQG's electronic trading customers have direct market access via our Hosted Exchange Gateways.

### Electronic Trading

CQG's front-end trading interfaces are the most advanced in the industry. CQG delivers electronic trading connectivity to more than forty-five exchanges. Traders can take advantage of CQG's high-speed network of distributed exchange gateways and partnerships with over one-hundred FCM environments.

### Server-Side Trading Tools

CQG's server-side tools eliminate the impact of geographic latency to give traders optimal order execution that competes with the most sophisticated trading systems in the world. Spread orders, orders into aggregated markets, and smart iceberg orders are managed on CQG servers co-located with exchange matching engines. CQG installs state-of-the-art servers and network equipment that is monitored around the clock to ensure a superior experience trading complex strategy orders.

### Real-Time and Historical Data

High-speed real-time and historical market data is delivered from over one hundred global sources, including futures and options on futures, equities, foreign exchange, fixed income, energy, OTC markets, and proprietary data.

### Analytics and Decision-Making Tools

State-of-the-art charting and analytics include exclusive tools designed for today's electronically-traded markets. Numerous chart types and over one-hundred analytics are fully customizable. Trades can be auto executed using alerts based on price levels, trend lines, studies, conditions, and time.

### News

Available news sources include comprehensive Dow Jones Newswires, The Hightower Report, and Market News International. Multilingual versions of Dow Jones News are available. The CQG News design supports secure delivery of proprietary customer feeds.

### Risk and Account Management for FCM Partners

CQG's risk management module enables FCMs to perform pre-trade and post-trade risk evaluation using CQG's industry-leading proprietary margining system.
