

CQG M | A mobile platform for global traders

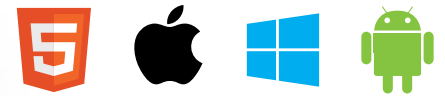

Core functionality always at hand

CQG M has all of the data quality, coverage, and reliability that global traders have come to expect. Essential functionality in CQG M keeps on-the-go traders on top of markets and positions:

- Mobile market data coverage, including futures and FX with several quote board styles
- Futures and FX trading with support for basic order types, GTC, and GTD
- Orders and Positions views
- Charting tools and analytical studies

Power, Accessibility, Versatility

Built with HTML5, protobuf, and websocket technologies for the best cross-platform and device performance, CQG M delivers advanced market data, order management, electronic trading, and charting analytics on phones, tablets, PCs, and Macs.

CQG M provides global traders with market data, charting analytics, and trade execution capabilities anytime, anywhere.

Connectivity

- CQG M connects traders to CQG's full range of tradable symbols. Additional information is available at:

<http://cqg.com/trade>

- Trading in CQG M requires an account with one of CQG's FCM partners. The FCM partner list is available at:

<http://cqg.com/fcmpartners>
