

CQG

One for all. All for traders.

Traders, analysts, brokers and bankers.
Hitters, takers and candlestick makers.

Global Connectivity

Access exchanges around the world for both market data and trading. Our ultra-secure, high-speed, consolidated market data feeds deliver real-time and historical data from over seventy-five global sources. Life of contract data included.

Modern Graphics and Analytics

Charts are a trader's visual portal to the price movements of the markets. CQG's graphics have always set the standard and CQG One continues that tradition. We offer traders a large number of chart types, all with easy-to-use features.

CQG One builds on the success of CQG Desktop. All future advanced charting and analytics, innovative trade routing functionality and more will be available in CQG One.

Pro Trading Features

Trade global markets with confidence and efficiency. Set up CQG One's trading interfaces to match your trading style. Our trading interfaces offer features specific to the professional trader's requirements including single-click trading from the price scale, Market-by-Order/Detailed DOM, server-side smart orders, and CQG Algos.

Pro can mean easy-to-use

You will quickly see how intuitive our platform is to use, configure, and deploy. From user provisioning, to building and sharing portfolios, window linking, and drag and drop tabs. CQG One makes trading workflow comfortable and efficient. Less time in setup, more time in the markets.

CQG Algos: Trade Optimally

Ever evolving technological advances in electronic trading present us with unique opportunities and distinct challenges. Capitalize on these and gain better control of your trading strategies with CQG Algos.

Market participants looking to execute large volumes of orders also endeavor to get the best price available in their market. The best price available can be nebulous: Is it attained by aggressively paying up for an immediate fill or by working the order over time? At the risk of the market slipping away, either is an option, but there is a better solution.

The above challenges led to the evolution of a new technology and tools to execute large orders: CQG Algos.

Browser or Install

Our lightning fast HTML5 means easy access to the markets from anywhere, anytime. Updates with new functionality happens seamlessly over the air in off-trading hours. For institutional customers, a windows installed version will be available for IT compliance.

Award-Winning Customer Support

Our award-winning customer support teams operate from ten locations across the globe and strive to exceed customer expectations twenty-four hours a day.

Our customer support is backed by product development staff in six countries, our product specialists, and our data quality and operations teams.
