

Integrated for the Professional Trader

CQG Integrated Client

CQG Integrated Client combines innovative electronic trading tools, global market data, and advanced analytics in one application.

Electronic trade routing

Decision-making tools

Consolidated market data

Best-of-Class Tools

Integration and efficiency.

Our Flagship Product

CQG Integrated Client (CQG IC) offers seamless integration and flexibility. Our flagship product provides access to global market data and includes innovative trading interfaces for electronic trading and order management. CQG IC offers industry-leading charting and analytics, quote displays, and exclusive tools designed for electronically-traded markets.

Server-Side Speed

CQG's server-side tools eliminate the impact of geographic latency to give traders optimal order execution. Spread orders, orders in aggregated markets, and smart orders are managed on CQG servers co-located with exchange matching engines. CQG installs state-of-the-art servers and network equipment that is monitored around the clock, ensuring an optimal experience trading complex strategy orders.

Global Connectivity

CQG delivers Direct Market Access to exchanges around the world. CQG is connected to over seventy-five market data sources and more than forty-five exchanges for electronic trading. Buy side or sell side, forex or futures, equities or energy, foreign or domestic, CQG connects you to the markets.

Award-Winning Customer Support

At CQG, we know that service is most important to our customers. Our award-winning customer support teams operate from ten locations across the globe and strive to exceed customer expectations twenty-four hours a day. Our customer support is backed by product development staff in four countries, our product specialists, and our data quality and operations teams. We go the distance to ensure the quality and performance of our electronic trading networks.

Consolidated Market Data

Fast. Accurate. Reliable.

- Portfolio and Instrument Monitors
- Exclusive tools designed for today's electronic markets
- Over one hundred basic and custom studies
- Custom formula builder
- Various types of alerts
- Powerful trade system design and backtesting features
- Advanced options strategies analytics

Electronic Trade Routing

Engineered for Speed.

CQG delivers electronic trading connectivity to more than forty-five exchanges. Traders can take advantage of CQG's high-speed network of distributed exchange gateways and partnerships with over one hundred FCM environments. Features include displaying depth of market on price ladders and trading directly from quote pages. CQG provides comprehensive pre-trade risk management.

Order Routing Tools

Order entry and management tools meet specific requirements for the trader:

- Multi-legged, intermarket, intramarket, and exchange-traded spreads can be created, traded, and managed (CQG Spreader)
- Orders for outright and spreads based on yields
- Three depth-of-market order book views of the electronic exchanges (DOMTrader®, Order Ticket, and Hybrid Order Ticket)
- A trade routing application that can be attached to any CQG application, such as a quote board or chart (Order Desk)
- CQG's server-side order routing gateways manage where you get filled when you trade similar instruments on two or more exchanges (aggregation)
- A quote display that includes trading functionality along with the ability to link to a chart (Split Quote Board)
- Spreadsheet trading with over two hundred market data elements available, including order routing (Spreadsheet Trader)
- One order routing tool minimizes use of screen real estate (Order Ticket)
- CQG and custom study values and condition alerts can be displayed on the DOMTrader

CQG Smart Orders

CQG supports both exchange-supported and synthetic orders. Each smart order has unique features designed to aid the trader in better order and trade management. Smart orders include:

- DOM-triggered stop/stop limit
- Trailing limit
- Trailing stop/stop limit
- Bracket
- Order-cancels-order
- Study-following order
- Condition following order
- Alert trading
- Funari
- Algorithmic orders, including iceberg and offset stop limit

CQG Integrated Client System Requirements

- **Processor:** Dual-Core. Intel® Core™2 Duo (2.33 Ghz or better) suggested. Intel Core i5 or i7 is recommended.
- **Operating System:** Windows® 8, Windows® 7, Windows® Vista, or Windows® 10. 64-bit Windows® 7 recommended.
- **Memory:** 4GB RAM. 12GB RAM recommended.
- **Hard Drive:** 200GB, 7200RPM with 4GB of free hard disk space. 128GB SSD with 20% of free hard disk space recommended.
- **Video Card:** Dual-port graphics adapter with 128MB of memory, 64MB per port. 1GB DDR3 or better recommended.
- **System Setting Specifications:** Hibernate and stand by modes cannot be used on a system running CQG IC. Hard drive power-saving features should be disabled. Exclude CQG from all firewalls and virus checks.
- **Internet Access:** Internet service via a high-speed connection, such as DSL, cable, or fixed wireless/wireless local loop (WLL). Wireless Internet connections are not recommended, especially broadband over a Wi-Fi card. Dial-up is not supported.
- **Monitor Setups:** These specifications are appropriate for single- and dual-monitor setups. If you have three or four monitors, you will need a better processor, video card, and network connection.
